

Refer to this guide for steps on how to connect your modem and use your WiFi network

### Step 1: Connecting to the Internet

From the rear of your modem, plug the Phone Cord into the grey Phone port. Then, plug the other end of the phone cord into a telephone jack.

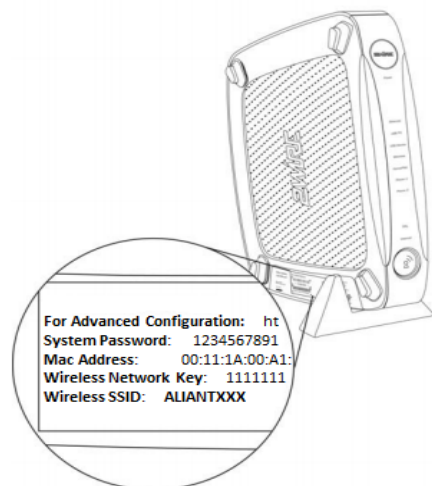

Now, from the rear of your modem, connect the Power Adapter. Then, plug the Power Adapter into an external power source.

Wait at least 2 minutes to complete the start-up phase.

From the back of your modem, plug the ethernet cord into any Ethernet port. Now, plug the other end of the ethernet cord into a working ethernet port on your computer.

Check that the front panel of your modem is behaving as such:

- Ethernet (blinking green if connected to computer)
- Power (solid green)
- Broadband (solid green)
- Internet (solid or blinking green)

Bottom

Should you have difficulty browsing or, are not seeing the expected displays on the front of the modem, contact our technical support team at 1-888-414-1958

## Quick Installation Guide

### Included Equipment

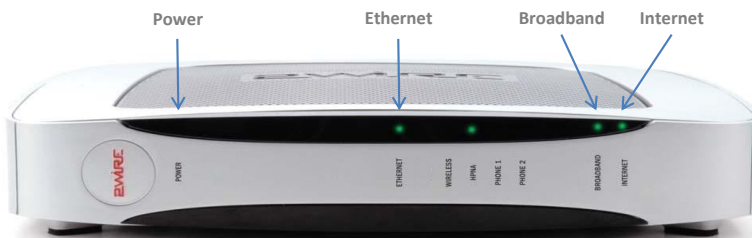

Ethernet Cord

Phone Cord

Power Adapter

Front

Rear

### Step 2: Connecting Devices to your Wi-Fi Network

**Step 1:** In the Wi-Fi settings of your laptop, tablet, smartphone or other device, look for your modem's wireless network name (found on the bottom of the modem under "Wireless (SSID): XXXXXXXXXXXX") and click or tap to connect to it.

**Step 2:** When prompted for the security key or password, enter your Wi-Fi Key (found on the bottom of the modem under "Wireless Network Key: XXXXXXXXXXXX") and select Connect to go online.

## Congratulations! You have successfully setup your ACN High Speed Internet
